Increase your reach over shrubs, fence lines and other obstructions with a skid steer mounted 914HC hydraulically driven digger. It's a great time saver with exceptional up-front visibility and control. Frame design incorporates a gearbox cradle to eliminate auger swing during transport.

**Description:** Choose from 6" to 14" diameter augers. Counter weights assures the digger maintains its vertical position. Note: These diggers will also fit on tractor loaders equipped with the "universal" skid steer attaching system. Models are also available for tractor loaders with the Euro/Global bucket quick attach system.
