

High Lift, Roll-Out Buckets For Wheel Loaders

Improve the dump height ability of any loader, easily clearing 13'6" trailers while increasing the productivity of single-side filling operations.

Perfect for feed truck loading, recycling centers, landfill/transfer stations or anywhere increased dump height and accurate load placement is required.

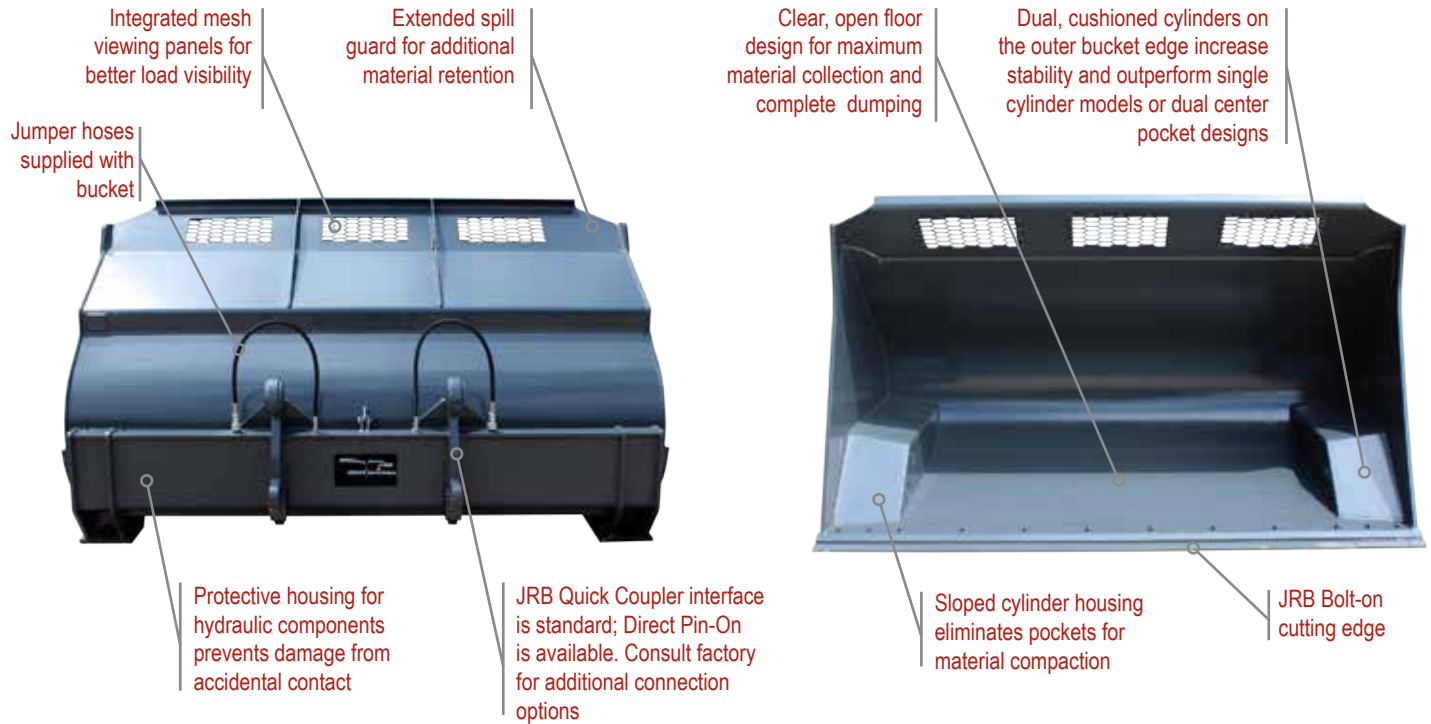

The JRB Roll-Out Bucket utilizes twin, dual-cushioned cylinders to tip the bucket on it's edge effectively doubling the working dump height of the bucket.

The carriage arms are positioned on the outer shell of the bucket to add stabilization. This also prevents twisting and provides a large, open floor surface.

Dual-cushioned cylinders provide smooth operation and reduce the impact of the bucket on the machine and coupler.

Roll-Out Bucket for Wheel Loaders

Quick Coupler Style Interchange (QC)

Direct Pin-On Style Interchange (PO)

All Roll-Out Buckets come in QC or PO attachment styles and the jumper hoses are included.

Class	Part Number	Width	Heaped Capacity	Cutting Edge	Weight
